

Anders Heating Company LTD

PRESS RELEASE: 21 March 2007

FOR IMMEDIATE RELEASE

Industry has to stay on top of environmental technology

Anders Heating host free briefings

“In today’s budget the Chancellor was heavily promoting green initiatives including zero carbon homes. We see that across the country cities are bringing in the Merton Rule which specifies building projects over a specified size must use 10% renewable energy. The reality in the construction industry today is that if you don’t go green you will lose business” explains Tim Anders, MD of Anders Heating Company Ltd.

Helping the industry to keep up on the latest environmental technology Anders Heating is hosting the Complete Solution Event. This event is an opportunity for architects and specifiers to talk to key environmental manufacturers, get the latest information, see product, understand their advantages, costs and installation.

There will be a series of six CPD seminars and an exhibition looking at Underfloor Heating, Solar Energy, Ground Source Heat Pumps and Rainwater Harvesting.

Anders Heating Company Ltd. one of the UK’s leading installers of sustainable heating and water solutions is hosting the event along with top manufacturers Rehau, Worcester Bosch and WPL.

The Complete Solutions Event will be held on 18th May 2007 at the Holiday Inn High Wycombe. If you are interested in registering for this event please contact: Sarah Pullen on 01491 614694 or email sarah@andersheating.co.uk
