

Anders Heating Company Ltd

**PRESS RELEASE: 4 June 2007**

FOR IMMEDIATE RELEASE

## **Anders Heating experts in renewable heating solutions creates online resources for architects and specifiers**

Anders Heating launched their new website [www.andersheating.co.uk](http://www.andersheating.co.uk) with online resources for green heating solutions at their “Complete Solution” event last week.

The new website not only shows the full scope of Anders Heating business. “It is designed to help and educate professionals on environmental heating solutions. It provides accessible technical information as well as a large set of previously asked questions and their answers” says Tim Anders.

However, with green technology changing constantly – the “ask an expert” feature will be important to our clients. Professionals can submit a new question which will be answered by one of the experts at Anders Heating and have the answer posted onto the website, so all clients can benefit.

Anders Heating has taken the lead in environmental heating products. They demonstrated this by hosting the Complete Solution event. The event was successful because it informed and educated architects and specifiers through a series of free seminars which included: Ground Source Heat Pumps, Solar Energy, Underfloor Heating and Cooling and Rainwater Harvesting

Three major renewable energy suppliers supported the event – Rehau , Worcester Bosch and WPL. “We were delighted to partner Anders Heating in such an event and were pleased with the huge amount of positive feedback received” said Gunter Franke – General Sales Manager, Rehau.

This event allowed professionals the opportunity to see the products. WPL displayed a full size rainwater harvesting tank and Worcester Bosch showed working solar panels. Anders Heating were pleased to show for the first time a full working model demonstrating Rehau underfloor heating. Architects and specifiers can make an appointment to view the model by contacting Sarah Pullen on Tel: 01491 614694 [sarah@andersheating.co.uk](mailto:sarah@andersheating.co.uk).

“It really helped to be able to see the different floor types as it is not always easy to tell from a brochure which system is most suitable” said Rhian Wood from Purple Architects.

Ends

Notes to the Editor:

### **Company Background**

Anders Heating Company Limited is a family run company based on the Oxfordshire/Buckinghamshire border. Founded in 1996 by Tim Anders, they design, supply and install efficient and reliable heating solutions with a special interest in environmental technologies. They have a team of 20 fully trained and experienced engineers who deliver a first class installation throughout the South East.
